EDUCATION

B.S. Computer Science

Liverpool University

2014-2017

I completed my Bachelor of Science in Computer Science from Liverpool University in 2018, achieving a 2:1.

Foundation Degree

Liverpool University

2013-2014

To get onto the B.S I needed to complete a foundation degree.

PROFILE

Hi! I am a software developer based in the UK, who specialises in full stack development. I primarily work with *C#.net* for the backend and *JS, HTML and CSS* on the front. Over my professional years, I have worked on numerous different projects and technologies.

Outside of development I have several different interests and hobbies, including music, astronomy, football, reading, travelling and gaming.

EXPERIENCE

Indrani Bridal

2020-2021

I was hired by Indrani Bridal on a short-term basis to achieve several specific goals:
- Build their website
- Digitalise their stock system
- Increase their online presence
I achieved these goals by:
- Organising their stock room
- Creating a *SQL* database to store dress meta data
- Then I built their website, https://www.indranibridal.co.uk/.

360 Systems

2019-2020

360 Systems is a software development house which offers web application development to clients. As a junior software developer my day-to-day role was to:
- Assist the seniors in maintaining existing code bases
- Bug tracking
- Build solutions to new projects
- Bespoke report generation
In my time I:
- Helped maintain several large code bases (*C#, .net framework, HCL Notes/Domino*)
- Built a report generating tool for a target tracking project (*Visual Basic*)
- Generated reports for the payment slip system (*SQL*)

eBay Business

2016-2019

At university, I began buying and reselling secondhand goods for a profit. By the time I had left university it was a full-time business. My role involved:
- Sourcing and obtaining stock
- Advertising and selling via eBay
- Market Research (what is selling, profit margins, etc.)
- Bookkeeping
